SMPRO Outage Feedback

Here we are again! With only a couple of weeks to plan for an outage we managed to turn this one around in no time at all. Fortunately, we had a great team leading us through the planning, having dusted off the package that we planned to do pre-lockdown. The short notice added to the pressure, but nothing ever seems to phase you. Well done!

An exceptional performance by the OneAIM Team who always remain focussed at the sharp end of the wedge, no matter what this system throws at us. Your commitment to the safety of the facility, working extended hours with our Construction Team to keep us safe on a system that never ceases to give us a few surprises doesn't go unnoticed.

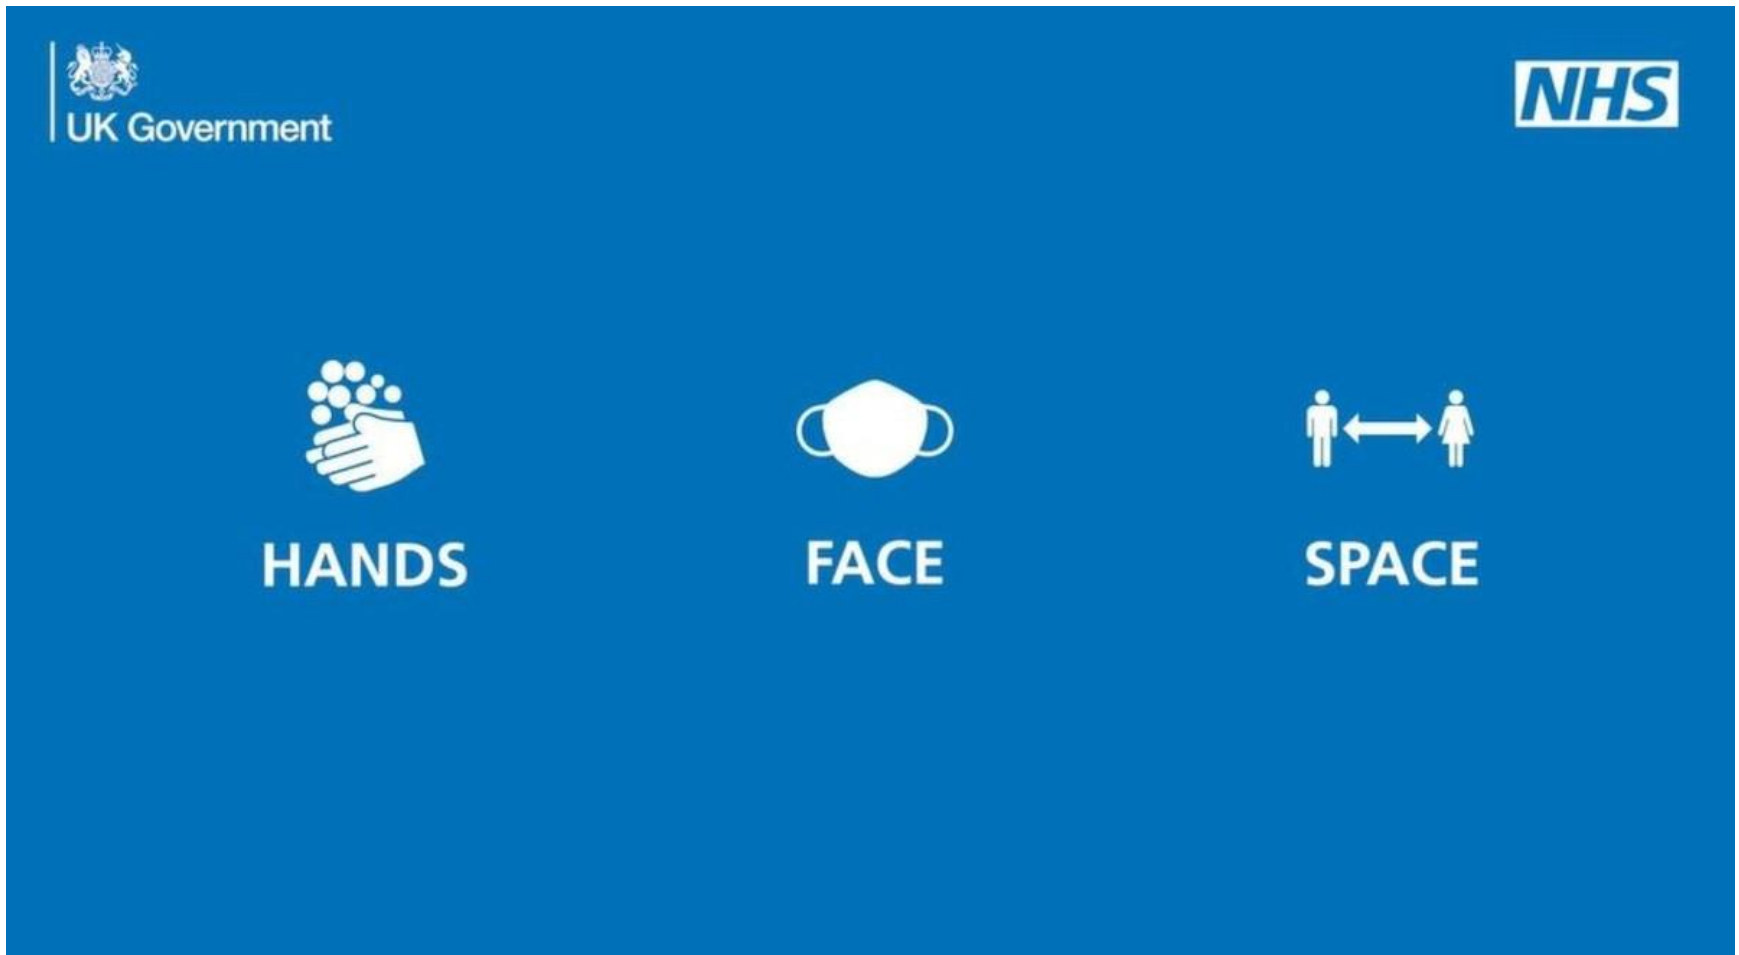

Our extended team stepped up again to provide us with their amazing support including Mechanical Team, Kaefer, HP&S, Design & Engineering, Quality Teams and so many others that it would take all day to mention everyone. Please pass on my thanks to your people... We couldn't have done it without you.

I can't speak highly enough of the support and dedication from the integrated team who have consistently gone the extra mile to support the project and help make this happen. We are one team, making a difference, performing with passion, pride and pace.... A great example of the standards in our Manifesto.

I know quite a few of you have time off booked over the next couple few weeks. My advice is, switch off, have fun and enjoy the break. You deserve it!

Carly Merner – Project Manager

Reminder: C19

Holidays - reminder

Please remember that all holidays must be used by year end, except where permission has been granted to carry 5 days of 2020 entitlement over to Friday 9 April 2020 (form available online at www.one-aim.co.uk)

Any holidays bought under the holiday purchase scheme must also be used by year end, these cannot be carried over.

Xmas stand down for our site based team is Friday 18 December to Monday 4 January 2021 (7 days required).

Personnel wishing to take an extended Xmas break in December, must discuss this with their line manager, approval is not guaranteed as resource levels appropriate to site requirements must be maintained.
